2	the trains mentioned under 1 a and b above carried an air force unit and aircraft equipment. Since the aircraft were crated, specific types would not be determined. some military trains had previously been dispatched from the ammunition plant in linner Neustact to Hegyer tom. These trains were strictly guarded and access to them was prohibited. Too of these trains consisted of flatears having large crates as loads. the shipments consisted of jet a ircraft.	sha
1.		
2.	Comment. The first two trains proba	
3.	carried a fighter division which moved from Wiener Reustadt to some undetermined area outside of Austria. The reported rail shi ment of a reaft, the observation in Tener Neustadt of crates for MiG-15 and the small number of MiG-15 observed there tend to confirm this movement. The security locomotives employed for these shipments reveal the importance of the load earried make it well possible that aircraft were involved. Such security measures had only been observed so far on occasion of railroad trips by high-ranking persons. It is believed that the fighter division concerned moved to a place for distant from Wiener Neustadt, because the planes would certainly have flown if the divisional moved to western Hungary. Comment. This is impent from Hegyeshalom to Wiener Neustadt was of important.	ed 50X1-HUM ed ve
	similar to those mentioned under 1 a and 1 b. It remains to be seen what air forcunit will re-occupy Wiener Neustadt airfield.	e
